Astrophysics and Space Sciences Transactions

Open Access Journal of the
Arbeitsgemeinschaft
Extraterrestrische Forschung e.V.

AEF

Aims & Scope

Astrophysics and Space Sciences Transactions (ASTRA) is an international scientific journal dedicated to the publication and public discussion of high quality original research on all fields of Astrophysics and Space Sciences and related technology:

- Astrophysics
- Cosmic Rays and Gamma Astronomy
- Interstellar Matter
- Heliospheric Physics
- Solar and Stellar Physics
- Planets, Comets, Asteroids and Dust
- Extrasolar Planets
- Magnetospheric Physics
- Scientific Instrumentation

ASTRA has a modern publication process, characterized by the following features:

- fostering scientific discussion by interactive public commenting
- referee reports available on request
- rapid publication
- double blind review process
- all publications freely accessible through financing by moderate page charges
- exploitation of the full potential of electronic media, like efficient linkage of related information and inclusion of colour plots, animated visualisation etc. at no extra charge

Publication Policy

- Free online access to all articles following the Open Access publication model.
- Rigorous peer-review of all articles prior to publication.
- Moderate service charges.
- No extra charges for color illustrations and supplementary material, e.g. movies, data sheets.
- Authors keep copyright. Papers are published under the Creative Commons Attribution License.
- Long term archiving & e-archiving and indexing in scientific databases & search engines worldwide.
- Efficient new way of publishing special issues.
- Moderate charges for printed issues.

Journal Facts

- indexed in ADS, DOAJ, and others
- e-archived with Portico
